RALS™

DEVICE CONNECTIVITY FOR POINT-OF-CARE TESTING

RALS™ DEVICE INTERFACING

The HemoSonics Quantra® Hemostasis Analyzer is a tabletop instrument that provides rapid blood coagulation measurements at the point of care. The device uses consumable cartridges to run a panel of tests that provides clinicians with the information needed to make rapid and targeted blood transfusion decisions.
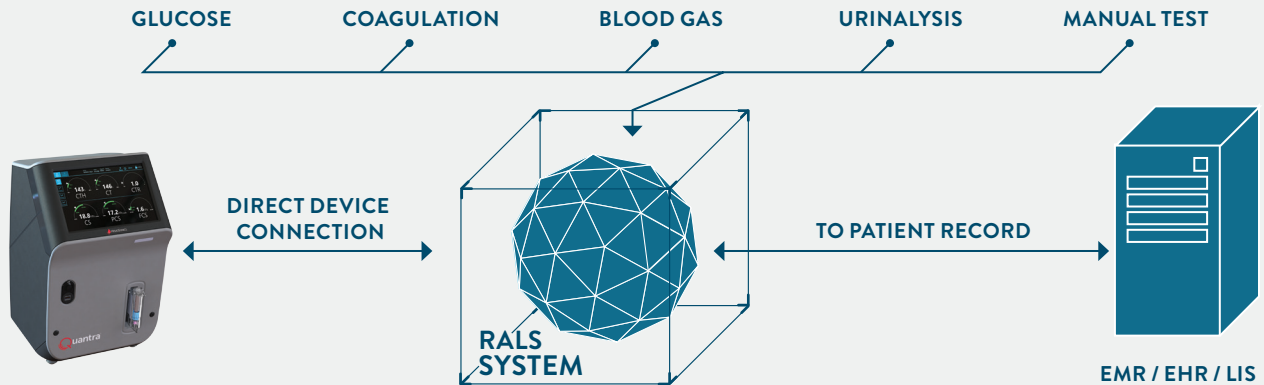

CONNECTIVITY TO RALS ENABLES USERS TO:

- Centralize all test results into the RALS system
- Transfer results to an EMR/EHR/LIS
- Email results to operators and managers
- Access and manage mis-identified patient and out of range QC results
